Course Title : **Climate Change and Migration**

Language of Instruction : Turkish

Course Objective : The majority of recent natural disasters are either directly or indirectly related to climate change. Many disasters are caused by climate change, including rising temperatures, an increase in the frequency and severity of severe weather events, glacier melting, and sea level rise. Climate change, which endangers the ecosystem, biodiversity, human health, agriculture, and food security, causes rising temperatures, freezing temperatures, extreme precipitation, floods, droughts, and forest fires, displacing people and forcing them to migrate in many parts of the world. As a result of the aforementioned disasters, people may be forced to relocate either temporarily or permanently. In general, the purpose of this course is to examine the migration movements that occur as a result of the effects of climate change, using examples from around the world, in all of their dimensions (administrative, legal, geographical, and sociological) using political science data. This is made more concrete by presenting empirical research on how climate change migrations occur.

Course Level : Master

Course Type / Contents : As a political and social consequence of the disasters caused by climate change, analyses are being conducted on how migration should be understood and managed on the agendas of countries. In some cases, this course covers all aspects of insecurity caused by migration.

Course Credits : 3

Course Semester : Fall

Course Lecturer : **Prof.Dr. Elif ÇOLAKOĞLU**

Course Lecturer Nu. : -

Department Coordinator : Prof.Dr. Elif ÇOLAKOĞLU

Prerequisite : -

Teaching Techniques : Lecture (presentation), discussion, case study, and report preparation and presentation methods

Reading List : There will be readings assigned from various sources pertaining to each week's topic.

COURSE LEARNING OUTCOMES

Nu	Explanation
LO1	Understands climate change and disaster terminology
LO2	Understands concepts related to immigration and security issues
LO3	Understands the causes and consequences of migration, as well as the situation of climate refugees in terms of fundamental human rights
LO4	Identifies various examples, ranging from global to local, of how climate change influences population movement in various countries and regions around the world
LO5	Creates knowledge for the development of long-term solutions to the consequences of climate change migration
LO6	Learn about migration policies and related institutions that operate on a global scale
LO7	Learn how migration is dealt with in the context of security in the context of the relationship between climate security and disaster management in countries' national security strategies
LO8	Learn about Turkey's migration policies

COURSE LEARNING OUTCOMES

Nu	Explanation
LO1	Learns the basic concepts of disaster management.
LO2	Interprets legal regulations regarding disaster management.
LO3	Learns the elements of disaster management.
LO4	Learns current research methods and techniques regarding disaster management. He has knowledge of their planning and implementation.
LO5	Develops pre-disaster education and awareness projects.
LO6	Have information about the precautions to be taken before and after the disaster.
LO7	Assumes responsibility and can lead within the group and community to which one belongs to in solving disaster problems.
LO8	It provides an academic perspective and follows the discipline by learning the basic issues of public administration regarding disaster management in Türkiye and the world.
LO9	Analyzes the historical development of the Gendarmerie organization in Turkish disaster management.
L010	Evaluates the place and importance of the Turkish Gendarmerie organization in practice.

Course Title	: Seminar
Language of Instruction	: Turkish
Course Objective	: The course's goal is to identify a specific issue or problem in the field of public administration, collect relevant data, analyze and discuss the data, and present the findings in a report in accordance with the proposed scientific writing rules. It also aims to prepare students taking the course for the thesis writing process by outlining the methods and procedures for conducting research.
Course Level	: Compulsory
Course Type / Contents	: This context addresses topics such as developing a research question, displaying the literature review, and determining the research method in the field of Public Administration. The prominent issues in this field are discussed in addition to being up to date in the thematic speeches specified in the relevant course weeks.
Course Credits	: 3
Course Semester	: Fall
Course Lecturer	: Prof.Dr. Elif ÇOLAKOĞLU
